Refilling Bird Seed Feeder

This is an optional activity in case you’d like to feed the birds at cabin and feeder is empty. You don’t need to do this. This is a 2-person job as you need someone to hold ladder for you.

Seed and plastic filling container are in plastic hamper between garage door and door to screen porch.

Aluminum ladder, carefully placed to fill feeder.*

Fill square plastic container with seed. While on ladder, raise lid to feeder and pour in seed.

Once seed is in feeder, make sure lid is properly lowered back on top of feeder, and that metal can on chain is slid back down over top of feeder lid.

*Using ladder comes with risk. You accept responsibility for such risk if you choose to use ladder.
